KBS Shoreline Management Project Provides Training

The KBS Shoreline Management Demonstration Area (www.shoreline.msu.edu) transformed into a construction site during July. A Project GREEN grant funded construction of a biotechnical shoreline erosion control structure providing hands-on construction experience for twenty Certified Natural Shoreline Professionals— graduates of the Michigan Natural Shoreline Partnership's certification training program (www.mishorelinepartnership.org).

The new structure will be the focus of a 3-year research project to investigate plant establishment, resistance to invasive species and ability to withstand wind, waves and ice.
